

IN THE SPECIFICATION

Please replace the paragraph at page 6, lines 2-6 with the following amended paragraph:

The substrate (10) is made of materials selected from paper or plastic membrane that can be combined with the isolating layer (11). The isolating layer is made of wax, silicone or other materials easily separated from the substrate (10) after they solidify. Additionally, the resin layer (12), the first protecting resin layer (14) and the second protecting resin layer (15) are all made of resin.
